## **2016 IRONMAN VICHY - IMPORTANT SWIMWEAR RULING UPDATE**

Pro Athletes:

After discussion with the Federation officials, the Rule in place for swimwear at the IRONMAN Vichy is:

*When the use of wetsuits is prohibited, clothing covering any part of the arms below the shoulders and clothing covering any of the leg below the knee is deemed illegal equipment and is not permitted during the swim segment of the Race but may be worn after completion of the swim segment*

This means that A textile race kit may be worn underneath swimwear, provided, however, that the textile race kit must not extend past the shoulder and must not extend past the knees.

You are permitted to wear your race uniform under your swimskin during the swim portion, provided it is rolled down and is not covering your shoulders and upper arms and nothing is covering your legs below the knee.

If you have any questions, or are unclear please do not hesitate to reach out to your onsite contact:
